**Barron Lighting Group introduces the Exitronix Champion EMW.
The New Champion EMW performs in the most adverse weather conditions and intense cold, taking emergency lighting to new level of effectiveness and architectural design.**

Phoenix, Arizona (June 2014) The Exitronix division of Barron Lighting Group today introduced the Champion EMW, its latest addition to the Champion purpose-built emergency lighting lineup. The Champion EMW offers protection against intense cold or wet weather conditions and vandalism; its sleek architectural housing will compliment any project's design aesthetics. The Champion EMW includes the Exitronix G2 Guardian Self-Test/ Self-Diagnostics and incorporates contractor friendly features that allow for ease of installation and multiple mounting options.

Exitronix has given special attention to the aesthetics of the Champion EMW while maintaining its strength and durability under the most challenging conditions. The rounded-edge, contoured shaping of the impact-resistant, heavy-duty polycarbonate lens assists in repelling water. It is fully sealed and gasketed for protection against adverse weather and other elements while guarding against potential vandalism. The Champion EMW features a die-cast aluminum backplate for sturdy, reliable mounting that is also fully gasketed and sealed with a durable UV-resistant powder coat finish.

Jessica McCain, Exitronix brand director, explained, "The Champion EMW's sleek architectural design will transform any commercial application where dependable emergency units are required. This new product is ideal for coastal and other wet environments where high winds and adverse weather conditions are common."

Rated for use in wet locations and hose down areas, this is an IP66 rated emergency unit that offers multiple wattages and lamping options, NiMH battery and a cold weather battery heater option. The Champion EMW is equipped with fully adjustable high intensity LED or MR16 lamps. The LED option provides 207 lumens per lamp head, superior spacing up to 50' on center, a long life expectancy of 100,000 hours, and low energy consumption. The MR16 halogen option offers lamp wattages of 12, 20 and 25 and is also an excellent solution for lighting path of egress. The G2 Guardian Self-Testing/ Self-Diagnostic included in the Champion EMW performs automatic code compliance testing including a five minute discharge and self-test every thirty days and a ninety minute discharge and self-test every six months.
