

Barron Lighting Group Introduces Three New LED Lighting Solutions

Glendale, AZ – April 18, 2018 – Barron Lighting Group, the parent company to Trace-Lite commercial and industrial lighting announces the addition of three new lighting solutions: the MC2 10” LED Canopy, the BAW adjustable LED wallpack and the WLZ zero uplight LED wallpack.

“Barron Lighting Group is committed to expanding our offering of LED products in order to provide our customers with the best lighting solutions possible for their project needs. With that in mind, I am pleased to announce the addition of three new LED fixtures from our Trace-Lite brand,” said Heather McCune, Vice President, Sales Operations of Barron Lighting Group.

Trace-Lite offers LED lighting solutions including wallpacks, flood lighting, garage/canopy lighting and high/low bays for indoor and outdoor commercial and industrial lighting applications.

The [MC2 Series](#) is Trace-Lite’s 10” LED canopy, designed to set a new standard for all canopy applications with its minimal power consumption, low profile and low glare design. The specially engineered lens optimizes visual comfort without sacrificing lighting efficacy and does not yellow over time.

The [BAW Series](#) of LED luminaires features adjustable light bars that can be oriented in up, down and up/down orientations to create dramatic lighting effects. This family of product is offered in four different light outputs and two sizes to complement any building exterior and to accommodate multiple mounting heights.

The [WLZ Series](#) features an architecturally relevant low profile LED design in lumen packages ranging from 1500 lumens to over 12,000 lumens. Its high efficiency light engine is designed for optimal light control and distribution with zero uplight. This family of product is offered in several size housings to complement any building exterior and accommodates mounting heights up to 35’.

About Barron Lighting Group
