

Barron Lighting Group Introduces Round LED Garage Canopy

Glendale, AZ – April 26, 2018 – Barron Lighting Group, the parent company to Trace-Lite commercial and industrial lighting, announces the addition of its new RCL Series round LED garage canopy solution.

“Barron Lighting Group is proud to launch our new RCL Series of round LED canopies in the Trace-Lite brand. The RCL rounds out our offering of LED ceiling mount solutions for garage and canopy applications, replacing up to 250W HID for retrofit installations. With its low-profile and domed optics, the RCL provides uplight to eliminate any cave effect, without sacrificing light distribution performance,” said Alan Tracy, President of Barron Lighting Group.

Trace-Lite offers LED lighting solutions including wallpacks, flood lighting, garage/canopy lighting and high/low bays for indoor and outdoor commercial and industrial lighting applications. The addition of center baskets, strips, wraps, undercabinets and recessed downlights allows for a complete product offering perfect for new construction or retrofits alike.

The RCL low-profile round LED canopy features a domed lens allowing uplight and improved light distribution. Its high-performance light engine is designed for maximum efficacy and heat dissipation. The RCL is offered with an optional integral 1-10V dimming occupancy sensor to maximize energy savings. This product is ideal for applications including, but not limited to, parking garages, schools, office complexes, light commercial developments, apartments, walkways, entryways and stairwells.
