SEIZE COMMAND

The LiteLogic app gives you convenient control over your NLC components. With a **user-friendly interface** on Android and iOS, effortlessly manage your building's lighting system.

SYSTEM READY

LiteLogic's Network Lighting Controls system is designed for easy scalability. All devices are fully compatible with new and existing frameworks, ensuring **seamless integration**.

LIMITLESS POSSIBILITIES

Easily schedule individual lights, groups, and scenes. Seamlessly **link sensors across different groups**. Experience precise scene control with up to **127 options per zone**. Enjoy the freedom of **limitless zones**, supporting up to **100 devices per zone**.

EXPERIENCE THE BENEFITS

Take charge of your energy consumption and transform your environment into comfortable, well-lit spaces while enjoying **significant energy savings**.

SECURE

The NLC system, which offers UL Gold (1376) level IoT security rating. **Operating on a localized data-encrypted mesh network**, it provides an extra layer of safety for every device on the network.

KEY ATTRIBUTES

Our product offers a range of exceptional features. With daylight harvesting, occupancy settings, and scheduling already built-in, **energy savings** are effortlessly achieved.

VERSATILE

The NLC system provides **easy scaling** for integrating controls into new and existing networks. With downward compatible software updates, uninterrupted operation ensures a seamless experience.
